TECHNICAL SKILLS

Programming Language
JavaScript Framework
Database Technology
Tools
Operating Systems

JavaScript/ES6/7/8
NodeJS, ReactJS,
MongoDB,MySQL
Babel, Webpack, Gulp, Git and Github,
Unix/Linux, Windows, MacOS

EXPERIENCE

Country Details App

Designed application which integrates REST Countries API. Used to display varying details about every single country. Can be switched between light and dark mode

Tools and Technologies: React, SASS, Webpack Babel

Calorie and Macronutrient Calculator

This application takes the users weight, age, height, activity level and gender to calculate their recommended daily caloric/macronutrient needs. The user also has access to numerous recipes that includes calories per serving. This app utilizes the Edamam API which provides the recipes.

Tools and Technologies: React, SASS, Webpack Babel

Work Orders

This application integrates two different public API's, one returns a list of work orders and the other the workers. Each work order is matched with a worker using its specified id's.

Tools and Technologies: React, SASS, Webpack Babel
